ABSTRACT

This thesis is about teaching practice done in the children class in Lembaga Manajemen Bahasa Duta Nusantara Bhakti. The methods used in the class were the combination of two relatively new methods named Quantum Teaching and Brain Gym. This paper is aimed to see the result of the introduction of the methods of Quantum Teaching and Brain Gym after being implemented in the classroom, whether the students will experience a more fun learning and make them not reluctant in making mistakes and become more outspoken. The students were proven to be better in terms of their courage in speaking and they were not vulnerable of making mistakes because mistakes are not the sign of failure. The students, as well as the teacher, experience a new style of teaching and learning that intrigues both sides to be more motivated and inspired during the process.
