Abstract

Knowledge is one of the main resources of a company, these days however, knowledge are often being neglected. On the contrary, if knowledge is being well organized, it won't be lost and can be reused; also it would bring some benefits for the company as the work efficiency increased.

This Knowledge Management System using Lotus Notes-Domino Designer R.5 is made in order to make it possible for the company to organize the knowledge and distribute it to their employees.

In collecting the information needed, we use the Library Research and Direct Interview Method.

The Project Repository System, which is the case study of this thesis, will make it possible for the company to keep the entire project history and make it possible for the employees to gain the information details to be analyzed, troubleshooting problems, and tracking the ongoing project. The project details are: Opportunity Project, Ongoing Project, and Completed Project.

Keywords: Management, Knowledge Management, Project Repository, Lotus Notes
