ABSTRACT

There are only a few novels which are adored and loved by readers of all ages and also will be remembered for a very long time. One of them is the Harry Potter series, which tells about the adventures of a young wizard in the wizarding world. I am curious to discover some reasons that make the series become so popular, especially the newest series, Harry Potter and the Order of the Phoenix. It comes out to be its fantasy element that raises the reader enthusiasm to read the novels and to follow Harry Potter’s adventures. There are some valuable sources I have managed to collect from libraries, book stores and internet. From the analysis, I find out the characteristics, the laws and the type of the fantasy element. Besides, the novel contains many new words, slang expressions and figures of speech which are very interesting to be analyzed. Therefore, I analyze the fantasy element through the stylistics approach and then figure out that the stylistics gives influence to the fantasy element in the novel. In brief, the fantasy element in Harry Potter and the Order of the Phoenix, which makes a magnificent imagination world becomes possible to exist, is shown through many beautiful words’ choices and formations in the novel.
